

# NAT Guide 2025 - My First NAT Flight is Tomorrow

OPSGROUP Team  
15 October, 2024

The **latest edition** (2025) of the NAT Guide ("My First North Atlantic Flight is Tomorrow") has now been published. This **24-page guide** is for pilots and dispatchers, to help you understand the basics of North Atlantic flying.

In the fewest number of words possible we will tell you what you need to know about crossing the North Atlantic. If you have a couple of days to spare, then read the official ICAO North Atlantic Operations and Airspace Manual (NAT Doc 007). Otherwise, pay attention and you'll be an expert in 15 minutes.

So, what's different about the NAT?

## It is **BUSY**

There's a ton of traffic on the NAT. So, ATC squeezes most of it onto the **"NAT Tracks"** to make it easier for them to keep everyone apart. That doesn't mean it's easier for you.

## The rules keep changing

As soon as you think you've got things figured out, the rules will change. So we'll start with "What Changed" ... read on.

## There's a lot of water

And not many airports. So it pays to know which ones are suitable, and closest.

## Shanwick Shanwick

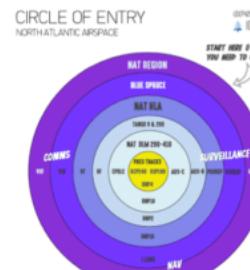

When you talk to "Shanwick Radio" it means you're not talking directly to ATC. So, when something major happens, know how to get off track safely without a clearance.

## Acronym heaven

HLA, RCL, CPDLC, RNP, NAT OTS, TMI, OCA, OEP, SLOP, PBCS. Know 10 out of 10? Good. There's more.

## "It's complicated"

Normally, you can get airborne, read the paper, do what ATC says, yawn, and land again. Easy. On the NAT, things are a good deal more challenging. **Read on ...**

## A FEW NOTES :

- 1 The NAT Beam (NATB) is 200-400 and everyone needs a NATB approval in the area 2 **MAX** required.
- 2 **MAX** is the maximum altitude of 10,000 ft. If you're flying at 10,000 ft, you're required to be on southern routes, with an altitude of 400 ft above and below 10,000 ft.
- 3 **MAX** is the maximum altitude of 10,000 ft. If you're flying at 10,000 ft, you're required to be north of 60° N, 30° E, 30° S, and south with 400 ft above. Through 10,000 ft and the eastern, western, and southern surveillance corridors.
- 4 **PMS Tracks** are the tracks that are used for NAT flights. They are the most efficient way to cross the North Atlantic.
- 5 **Standard NAT tracks** are the original 400 ft and 600 ft tracks.
- 6 **Standard NAT tracks** are no exceptions over that. **Separate** is a term of **ATC**, and **ATC** but not **ATC**.
- 7 You need **PMS** 200 ft and **ATC** in the text, and **ATC** from 200-400 ft high right or tracks including **ATC** but not **PMS** 200 ft required. either as in **ATC** or **PMS** **ATC**.
- 8 **ATC** need **PMS** 200 ft and **ATC** in the text, and **ATC** from 200-400 ft high right or tracks including **ATC** but not **PMS** 200 ft required.

## Contents:

- 1. What's different about the NAT?
- 2. Changes in 2024, 2023, all the way back to 2016.
- 3. (Updated 2024) **Circle of Entry** – a visual depiction of what equipment is needed to enter the different parts of the NAT region airspace.
- 4. **NAT Quick Map** – Gander boundary, Shanwick boundary
- 5. Routine Flight Example #1 – Brussels to JFK (up at 5.45am) – NAT HLA certification, Oceanic Paperwork, Special requirements, getting an Oceanic Clearance, Equipment failure, Weather deviation, and going off track.
- 6. **Non Routine-Flights**: No PBCS, No RVSM, No RNP4, No HF, 1 LRNS, No HLA, No ETOPS, No TCAS, No Datalink – what you can do and where you can go.
- 7. **Diversion Airports guide**: A couple of notes on each of the most popular diversion airports from Shannon to Goose Bay: What to expect.
- 8. **Airport data**: BGBW Narsarsuaq, BGSF Sondy, BIKF Keflavik, EGPF Glasgow, EGPK Prestwick, LPLA Lajes, LPAZ Santa Maria, EINN Shannon, EIDW Dublin, CYFB Fro Bay, CYYR Goose Bay, CYQX Gander, CYYT St. Johns, LPPR Porto, LPPT Lisbon, TXKF Bermuda.
- 9. **Overflight permits** – routine and special, non-standard airworthiness, how to get one.
- 10. **Special NAT procedures**: Mach number technique, SLOP, Comms, Oceanic Transition Areas, A successful exit, Screwing it up, Departing from Close Airports
- 11. North Atlantic **ATC contacts** – Shanwick, Gander, Iceland, Bodo, Santa Maria, New York – ATC Phone, Radio Station Phone, AFTN, Satcom, CPDLC Logon codes; and adjoining Domestic ATC units – US, Canada, Europe.
- 12. **NAT FPL Codes and Flight Levels**
- 13. The **Contingency procedure** – weather and diversions

- 14. **Flight Plan Filing** Addresses by FIR
- 15. NAT Clearance or no Clearance, guide to the new RCL process.
- 16. **Common Gotchas**: ATC and OPSGROUP Member favorites.
- 17. Links, Questions, Guidance

There are two options to download a copy of the NAT Guide 2025 (24 pages, 6Mb)

# NAT Circle of Entry (2025)

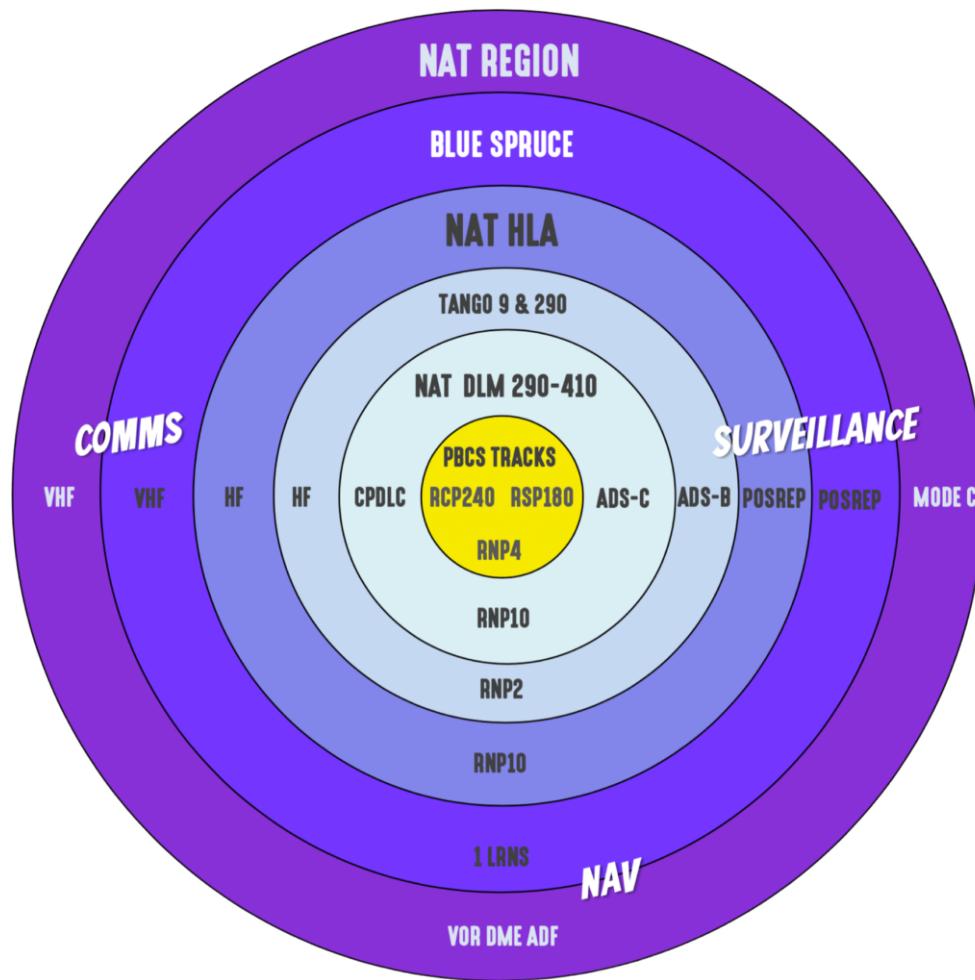

OPSGROUP Team  
15 October, 2024

For the **latest changes and updates on the North Atlantic**, including our most recent **Guides and Charts**, use our NAT reference page at [ops.group/blog/nat/](https://ops.group/blog/nat/)

We've updated the NAT Circle of Entry for 2025. As always, changes on the NAT continue without pause for breath - this version is the latest information as at October 2024. The Circle of Entry tells you what you need to get into each different sliver of North Atlantic airspace.

**Click on the circle to download** the more detailed PDF.

We've also published a new version of the **NAT Guide ("My First North Atlantic Flight is Tomorrow")**

Get a copy [here](#).

# My first NORTH ATLANTIC FLIGHT is tomorrow ...

**In the fewest number of words possible we will tell you what you need to know about crossing the North Atlantic.** If you have a couple of days to spare, then read the official ICAO North Atlantic Operations and Airspace Manual (NAT Doc 007). Otherwise, pay attention and you'll be an expert in 15 minutes.

So, what's different about the NAT?

It is **BUSY**

There's a ton of traffic on the NAT. So, ATC squeezes most of it onto the **"NAT Tracks"** to make it easier for them to keep everyone apart. That doesn't mean it's easier for you.

### The rules keep changing

**The Rules Keep changing**  
As soon as you think you've got things figured out, the rules will change. So we'll start with "What Changed" [read on](#)

There's a lot of water

**There's a lot of water**  
And not many airports. So it pays to know which ones are suitable, and closest.

**Shanwick** Shanwick

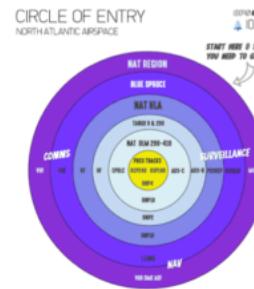

When you talk to "Shanwick Radio" it means you're not talking directly to ATC. So, when something major happens, know how to get off track safely without a clearance.

### Acronym heaven

Acronym heaven: HLA, RCL, CPDLC, RNP, NAT OTS, TMI, OCA, OEP, SLOP, PBCS. Know 10 out of 10? Good. There's more.

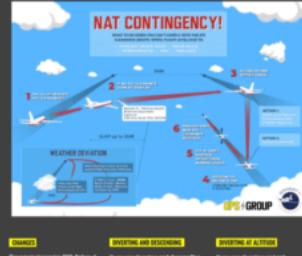

**"It's complicated"**

Normally, you can get airborne, read the paper, do what ATC says, yawn, and land again. Easy. On the NAT, things are a good deal more challenging. **Read on ...**

## CONTINGENCY PROCEDURES

Here's what to do when you need to respond quickly to an emergency, or weather – and can't get a revised clearance in time.

## **OPS CHAT - every Tuesday!**

OPSGROUP Team  
15 October, 2024

## Join the weekly international ops call!

OPS CHAT is a conversation about this week's changes and dangers affecting International Flight Ops, open to everyone!

It's on **every Tuesday at 1300 UTC**.

It's for Pilots, Dispatchers, ATC, and anyone else involved in international ops – and here are the key things we look at every week:

- **New risks and changes** this week affecting airspace, ATC, airports, and international ops
- The top 5 **Ops Alerts** published for OpsGroup members this week
- Conversation and chat
- **Unsolved mysteries** – unanswered questions from the Ops Group/Flight Ops slack channels.
- New member intros and group updates
- A **general Q&A** – bring a good Q and we'll match it with an A.

**When is it on?** Tuesday at 1300 GMT/UTC/Z. That means: 6am LA (sorry!), 9am New York, 2pm London, 3pm Amsterdam. Bring a timezone appropriate drink (If you're in a Brooklyn a coffee, if you're in Berlin a coffee martini?) and join us for a group chat about all things ops.

If you're stuck on something in particular (a pesky overflight permit for Peru, perhaps ...) – ask your question and we'll find someone that knows. For the weeks highlights, we'll pop up a few maps and things to help show what's happening, but mostly this is really just a chat and pretty casual. As you might have gathered.

**How long is it on for?** Ah, 30 minutes maybe? Or longer if things get interesting.

**How do I join?** You will need:

- 1x computer device (example here)
- Electrical power
- A face (because we like seeing you)
- A watch (set an alarm for Tuesday 12.59Z)
- Aaaand a Zoom registration: here.

So in short – register and then show up. Turn on your video, and take part. Easy!

**Any other questions?** Email the team!

## New Dashboard Tool - Airports and Countries

Chris Shieff  
15 October, 2024

The screenshot shows a flight tracking application interface. At the top, a banner displays 'Closest Alternate: NZHN/Hamilton - 58nm' with a red '+' button. Below this, a section for 'Alerts' shows '1 for NZAA' and '4 for New Zealand'. A sub-section titled 'Most recent OPSGROUP Ops Alerts for Auckland' lists an alert for 'Active' status, '2 wks ago', at 'Airport' (partially obscured). The alert text reads: 'NZAA/Auckland With borders reopening to vaccinated foreigners from May 1, Execujet now have a new FBO here. It is open from 09:00 – 17:00 every day, with around the clock service on request. Other options remain Air Center One, and Swissport.' A 'More' link is shown. The date 'Apr 28, 2022' is also visible.

Hi Members,

If you're planning a trip somewhere, you might have used the search tool in the Dashboard. We've just added a new feature, so read on.

Let's plan a quick flight to **Auckland, NZ**. So, on the main Dashboard page, just type "**NZAA**", or "**Auckl**...".

Airport search

AKL 

**NZAA Auckland, New Zealand** AKL

Country search

You'll get this panel showing all the things we know about Auckland in OPSGROUP.

Click on the **Alerts** tab to see what's been happening lately, from a flight ops point of view.

Until now, we've been showing current alerts, and those that expired in the last 3 months.

But now, we've added the option to see **all historical alerts**.

Older stories [9 for NZAA](#)  
Historical alerts for Auckland: everything ever!

Expired 1 year ago Runway Oct 23, 2020 Nov 05, 2020

**NZAA/Auckland** The airport will be closed to fixed wing traffic on November 4 from 23-05 local time (10-16z) for runway works. If you're arriving after the published closure period, it is recommended you take extra holding fuel in case there are delays getting the runway up and running again (NZAA Notam B5787/20 refers).

Expired 1 year ago Procedure Jun 17, 2020 Jul 17, 2020

**NZAA/Auckland** New Zealand remains Covid-free, but there are new requirements for all arriving crews operating ad-hoc flights to Auckland. Crew must be taken from the FBO to the International Terminal for health screening checks prior to transport to local hotel to self-isolate until departure. Crews cannot use taxis, Uber or public transport to or from their hotel, transport must be arranged by the FBO. Only repatriation flights, Medevac flights, and approved ferry flights are permitted to operate into New Zealand. Thanks to Air Center One for the update. [More](#)

For both the **Airport** and **Country** search pages, you can go back in time to the beginning of OPSGROUP, and see everything ever said about that place. This might be handy to get an overview when operating to somewhere new.

## What else?

Keep scrolling down and you'll see the rest of the tools that will help you with that particular airport.

**Airport Spy** reports from other members ...

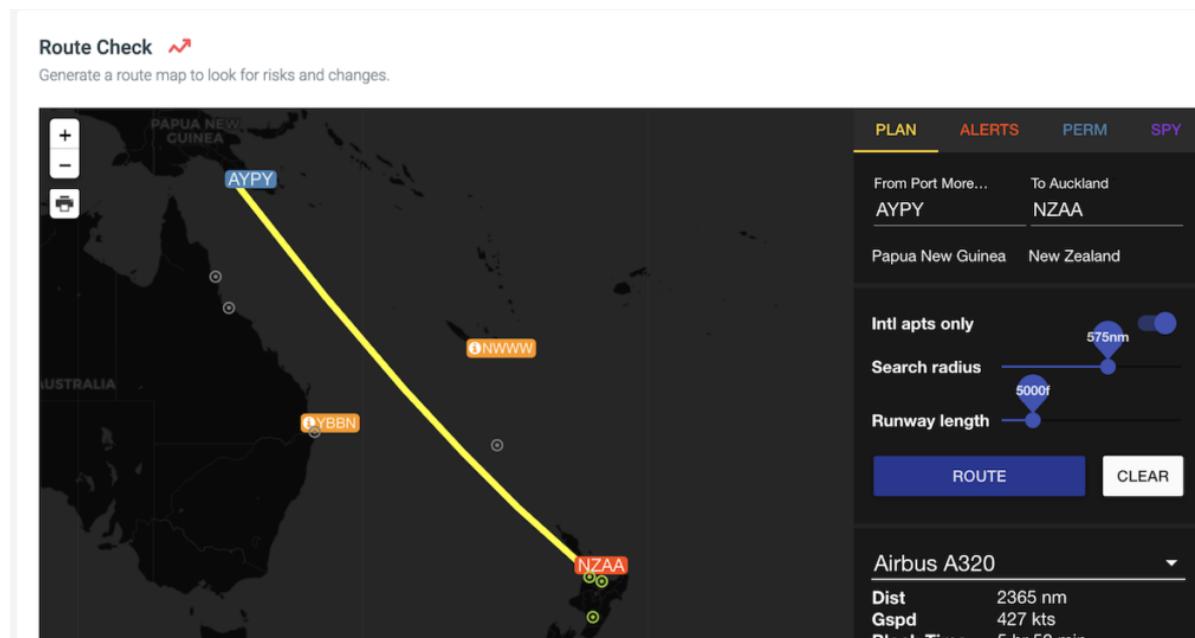

## Air Center One did an excellent job of handling our arrival

From NZWN (Wellington, NZ) to NZAA (Auckland, NZ). Arrived via the DAVEE4B STAR Runway 05R approach. Exited at A5, A, B1, C1 to Air Center One located in the northward our arrival. Robin Leach and his team understand the needs of private aircraft. FBO is walking distance to everything. Lots of restaurants close to the hotel. Outbound Customer scheduled take-off time. Cleared (to Honolulu PHNL) via MEMOR1P departure, TARIB to Auckland Oceanic NZZO via CPDLC passing 13,000

Run a quick **Route Check** to see what bothersome changes might affect you enroute ... and your fuel, time, distance.

Here we'll plan a flight from Port Moresby to Auckland ...

# 2021 New North Atlantic Plotting & Planning Chart

David Mumford  
15 October, 2024

Hi members!

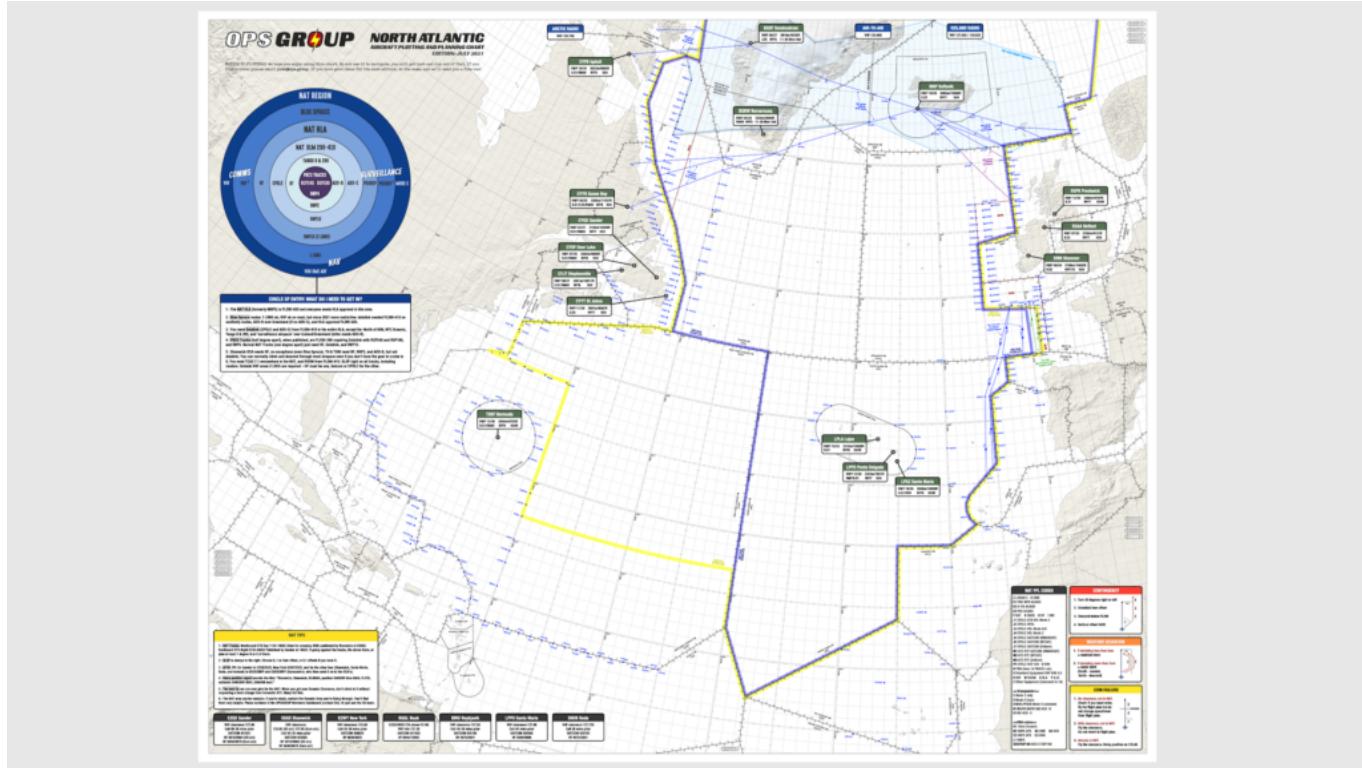

First, **thanks to all the group members who were part of making this.** We sat down from scratch and wanted to build the best possible NAT chart we could. A lot of work went into this, and we're grateful to you all! With this format and structure, we're also looking at making useful plotting charts for other areas like the Pacific, Africa, etc. – but for now, enjoy this completely updated NAT map for 2021.

So .. It's ready! You can grab it in Slack, or in your Dashboard. View it on your iPad or Laptop etc. as a PDF, or print it out as a giant wall map! It prints really well up to 15 feet wide – but you can also just put it onto A3 or A2 size paper.

If you're not a member, read on for how to get a copy.

## About the 2021 NAT Chart

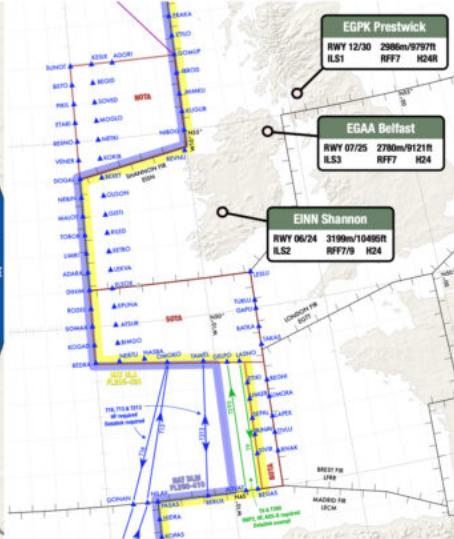

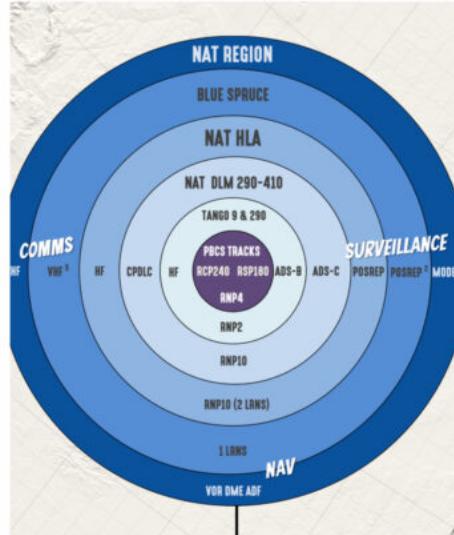

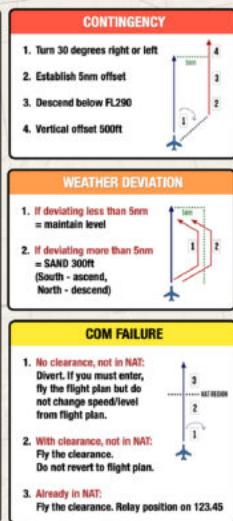

This chart is completely new – we started from scratch, expanded the coverage area, and then worked as a group to add all the useful things we could think of that a pilot or dispatcher crossing the North Atlantic might need.

New on this chart - effective July 2021:

- **FULLY UPDATED** for 2021 post-COVID flying!
- **EXPANDED** coverage area - much further down into the Atlantic, and further west.
- **NEW!** NAT Tips - using NAT Tracks, SLOP, filing an Oceanic Flight Plan, and helpful tips
- **NEW!** Quick reference for contingency, weather, and comms failure with easy graphics.
- **Updated:** NAT Airspace Circle of Entry 2021 - easily check what you need for Nav, Comms and ATC Surveillance depending on which bit of the NAT you will be flying through.
- Additional diversion airports, now 16 total primary NAT alternates with runway, approach, length, RFF, and hours
- Easy view of boundaries for HLA and DLM/Datalink mandated airspace
- Updated NAT FPL codes, clearance frequencies, Satcom, and HF
- Fully updated "South East Corner" with new Tango routes
- and ... Treasure Boxes!

NAT FPL CODES	
C	LORAN C
C	D DME
E1	FMC WPR ACARS
E2	D-FIS ACARS
E3	PDC ACARS
F	ADF 6 GNSS H HF IINS
J1	CPDLC ATN VDL Mode 2
J2	CPDLC HDL
J3	CPDLC VDL Mode A/0
J4	CPDLC VDL Mode 2
J5	CPDLC SATCOM (INMARSAT)
J6	CPDLC SATCOM (MTSAT)
J7	CPDLC SATCOM (Iridium)
M1	ATC RTF SATCOM (INMARSAT)
M2	ATC RTF (MTSAT)
M3	ATC RTF (Iridium)
P2	CPDLC RCP 240 D VOR
R	PBN (Item 18 PBN/01 etc)
S	Standard Equipment VHF VOR ILS
V	VHF W RVSM X IHLA Y 8.33
Z	Other Equipment (Comment in 18)

## Other chart features:

- :: Requirements for NAT tracks, PBCS tracks, datalink mandate.
- :: Common NAT Diversion Airports.
- :: Runway Orientation, Length, best IFR Approach.
- :: RFF Category and Opening hours.
- :: NAT FPL Codes and sample FPL.
- :: Blue Spruce routes and equipment requirements.
- :: All NAT Entry/Exit points with associated required landfall fixes.

## How to get the new chart, if you're not a member?

- **Option 1:** Buy the chart in the store (\$35)
- **Option 2:** Join OPSGROUP, and **get it for free!**

OPSGROUP members get this and other publications free of charge, all available through your member dashboard.

There have been **many changes on the North Atlantic** since we published our previous chart in 2019. Here's a few things to read up on:

- Feb 2021 changes here
- July 2021 changes here
- The full NAT timeline of all changes going back to 2015

We hope you find it super useful, but also have fun using it!

# NOTAM 2021 update: progress, at last

Mark Zee  
15 October, 2024

Here's something you might not have been expecting: at long last, **true progress on fixing NOTAMs**.

If you've been following the story over the last few years, you'll know that there has been an ever brightening spotlight on the problem. Here at OPSGROUP, we've certainly been vocal about the issue. The response to our first blog post back in 2017 was huge, and so we made it our mission: **Let's Fix NOTAMs**.

We started out with a campaign to bring attention to the problem: We wrote the Field Guide to Notams, ran a Worst NOTAM competition at EBACE, held a Notam Summit in New York, conducted a pilot and dispatcher survey with 2100 responses, asked OPSGROUP members for support and input, ran a design contest, and through all of this gathered ideas on how to fix things. That led to an updated article in 2019 titled "Why Pilots are reading a Reel of Telegrams in the Cockpit" – which gathered more energy and interest around the problem. We then formed a Notam Team, started the "Fixing Notams" website, worked with other industry groups looking at the issue like the AIS Reform Coalition, and saw the FAA host the first industry gathering on NOTAMs in November 2019. We started a petition to keep momentum going, with 8800 people signing our plea to fix Notams.

In terms of specific solutions, we tried a bunch of things. We built an AI bot with ICAO, called NORM – to see if we could use machine learning to sort out the mess. In the Notam Team, we looked at the problem from the ground up, and looked at building an entirely new system, called N2. We also collaborated further with ICAO to build the Notameter, a tool to analyse the quality of existing Notams. Internally at OPSGROUP, our small team spent many hours researching, pondering, idea generating and data analysing.

The result? Much learning, much discussion, much collaboration – but no concrete results or fixes. This is the way of things. NOTAMs are harder than they look. The AI was not able to make sense of Notams in the way we'd hoped, the initial Notameter was interesting but wasn't changing anything. A brand new system wasn't going to work: despite the failings, the existing system has buy-in and trust, and attempting to circumvent that with an entirely new mechanism sounds inspiring, but isn't practical.

But progress doesn't always come along the path that you expect. And in the quiet, dark days of a Covid-dominated December, a small group of die-hard Notam Fixers formed to continue the battle. Taking all the

learnings of the Notam journey over the last few years, we sat down together once a fortnight over the last few months, and forged a new path. Each of us represented our own group of allies in the mission: ICAO, IFAIMA, IFALPA, and OPSGROUP. This togetherness created a renewed energy to solve the problem.

**And now, we have traction.**

# NOTAM2021

Next month, ICAO will spearhead the launch of a **Global Campaign on NOTAM Improvement**. Our aim is to solve the Notam Problem in manageable chunks, gathering energy as we solve them and make progress. Rather than re-invent the wheel, we will fix the system from within, starting with the easier aspects and progressing from there. The first phase of this campaign focuses on **Old Notams**. At any one time, there are about 35,000 active Notams globally, and 20% of these – one in five – are old; in other words, not respecting the existing rules of Notams being issued in principle once only for a maximum of three months (everything else should go into the AIP, an AIC, or some other publication). We are drawing on the collective cooperation of the AIS community – the Notam Officers – to uphold the rules and get rid of Notams that don't follow them. The result will be a potential decrease of 7,000 Notams per month, and a 20% reduction in the size of the average briefing packet.

The ICAO Global Campaign on Notam Improvement will kick off with a worldwide webinar on April 8th, for which ICAO has issued an invitation to member states by State Letter. After this, a series of bi-monthly progress webinars will start on June 16th.

The backing of ICAO means we are now tackling the Notam Problem head on, with the fullest force.

The focus on “Old Notams” is just the first phase of this campaign. As well as tackling this particular aspect of the Notam Problem, we will be creating awareness of the wider issue, especially in the AIS community, and forming support mechanisms for AIS offices around the world to deal with not just Old Notams, but also further improvements down the track. In **Phase Two**, we plan to look more closely at how we can improve the mechanics of the system itself.

## **NOW, versus Later**

An important distinction to make here is that this work is on “**NOTAMs, Now**”. There is separate, ongoing work in the field of the “Future of NOTAMs”. You may have seen acronyms like SWIM and AIXM, and terms like Digital Notams or Graphical Notams. The FAA, ICAO, Eurocontrol, and other agencies are building a model for the future, when NOTAMs will change from the current AFTN format and transmission into an internet, or IP based, transmission and following a service-oriented approach. This work is valuable, but with a target implementation date of 2028, has a different focus. Even if it goes smoothly, it would not instigate change until 2028. Needless to say, if we don't fix the underlying issues now, it may not even solve them then, either.

## **Thing-Labelling**

For the enthusiasts, I'll delve some more into the Notam Problem, what we've learned, and what the next phase of fixing might look like.

In **Phase One**, the brief is simple and clear: remove Old Notams, and reduce the count. That count – or total volume of Notams – reached about 1.9 million in 2020. Reducing that count by 20% means a reduction in the volume of Notams that pilots are presented with pre-flight. It's a simple, quick win.

In **Phase Two**, we will be able to look at the first systemic change – not just reducing the count as in phase one, but finding ways to improve the quality and usability of the system as a whole.

One potential option is how we can label Notams. You might recall we built an Artificial Intelligence bot with ICAO, called NORM. The terms Artificial Intelligence (AI) and Machine Learning are in essence still interchangeable, and the latter makes things easier for most of us to comprehend. Machine learning is really just “Thing Labelling” (see this article from Cassie at Google). Very simply: tell me what this thing is about, and I can do something with it. NORM wasn’t able to “thing label” quite as well as we’d hoped, but the concept remains valid for Notams – if you can tell me what this Notam is about, I can do things with it.

We have a manual thing-labeller for NOTAMs built in: the Q-code. This five letter code, like **QFAHX**, which means “This NOTAM is about **Birds**”. The trouble is, that there are far too many choices. There are 179 Subjects (60 AGA, 47 ATM, 40 CNS, 27 Nav Warnings, 5 Other) and 77 Conditions (16 Availability, 16 Changes, 26 Hazards, 19 Limitations). The number of permutations, or possible 5 letter Q-codes, is therefore 13,783.

The result? As you might imagine, the person putting a NOTAM into the system has to choose a Q-code, and with that many choices, the same subject can have a host of different Q-codes. In a review of all Notams issued in 2020, we found 1,063 different Q-codes in common use. In addition, we found that 47% of Aerodrome Notams, and 25% of FIR Notams, used the Q-code “XX” or “XXXX”, which translates as “I don’t quite know which one to use”.

Net result: The Q-code isn’t a reliable thing-labeller as it stands. However, if we refine the number of available Q-codes to a set amount, like 50, or 100, we then have a robust and reliable way of labelling the Notam. And if we have a reliable label, then we can do two magical things: SORT and FILTER them. Sorting means that we can present critical items first (like a runway closure), and Filtering means we can exclude things we don’t care about (Birds, perhaps).

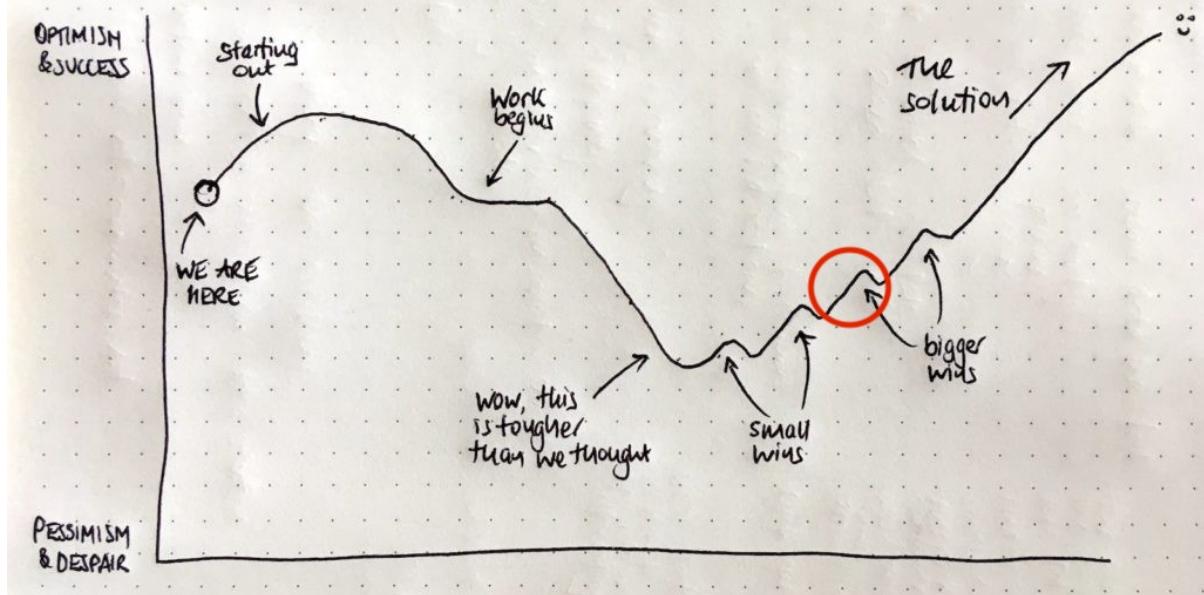

A key item on the Pilot wishlist is “**Show me the critical stuff first**”. If the NOTAM can be labelled to show “What is this NOTAM about”, it would allow end users (directly, or through the NOTAM distributors like Lido, Jeppesen, ARINC, etc.) to reliably filter and sort them. In other words, Closed Runways appear first and Birds and Grass Cutting appear last, if at all. The magic of refining the Q-code field to achieve this is that we don’t need to build anything new, make any structural changes to a Notam message (exceptionally challenging), nor create a burden on states to invest in new technology. It’s a simple, very effective, tweak.

There are other recognised issues: for example, the Upper Case format, Plain English vs Abbreviations, and in time, I believe we can solve those too.

## Getting closer to the solution

For those of you that have been with us for a longer period, you might remember the little chart I drew a year or two back. Fixing Notams was never going to be easy.

## The path to fixing Notams

I think we're somewhere around the red circle area. We have done so much, and we now have global attention, a harmonious, energised group of organizations working on the problem, and as of April 2021, the backing and full force of ICAO in this Global Campaign for Notam Improvement.

I'm excited to see what we can achieve from here.

## GoCrow planning map - 2020 update!

Mark Zee  
15 October, 2024

Hi again members!

There's a new version of **GoCrow** – the OpsGroup route analysis and planning map...

There's some cool new stuff:

- **SafeAirspace warnings** are now on the map, you'll see them very clearly. Click on a country for more info.
- All OpsGroup **Alerts** will show on the route
- **Permit information** is fed directly from the Permit Tool in your dashboard
- New underlays – all kinds of maps
- You can print a **route briefing**.

All of this is still in beta, there are still a few bugs and some design issues to work out, but it's pretty solid. Have a play with it! **Watch the video** above to get a better idea of what it can do.

GoCrow is here: <https://ops.group/dashboard/gocrow/>

Comments welcome!

---

## Jobs: our shared spreadsheet

Mark Zee

# Jobs

Share the open positions you know about

**Flying jobs**

*Choose one to get started*

**Ops jobs**

**Hi all!** This is a shared document that all OPSGROUP members can edit. If you know of a position not listed, just add it. Very simple concept! Just make sure this is an **active position** that is **available now**.

Hi members!

A very simple **new little thing** in OPSGROUP is now alive ...

The idea is wonderfully easy. **It's a shared Google Sheet**. All group members have access to add and edit.

If you are looking for a new Flying or Ops job, browse the jobs listed.

If you know of a Flying or Ops job, add it ...
