

Emerging Airspace Risk: Cambodia & Thailand

Chris Shieff
28 July, 2025

Update: July 28

Good news: **Cambodia and Thailand have agreed to an immediate and unconditional ceasefire** starting midnight local time on Monday July 28 (1700Z), following five days of intense fighting along their shared border. Both sides have committed to reopening communication lines and setting up a monitoring mechanism to maintain the truce.

While this is a major step toward de-escalation, the situation remains fragile – **caution is still advised near the border region.**

There are **no changes so far to the Phnom Penh FIR danger area (SFC-UNL)**. VDPF Notam **A0092/25** remains active.

Original Article: July 25

Key Points

- A sudden military escalation began on July 24 along the central portion of the Cambodia-Thailand border, around 100-150 NM north of Siem Reap.
- Both sides accuse each other of firing first. Thailand has carried out airstrikes using F-16s.
- A danger area now extends along much of the border, SFC to UNL. Overflights may face elevated risk from unannounced military activity, including GPS interference.

Background

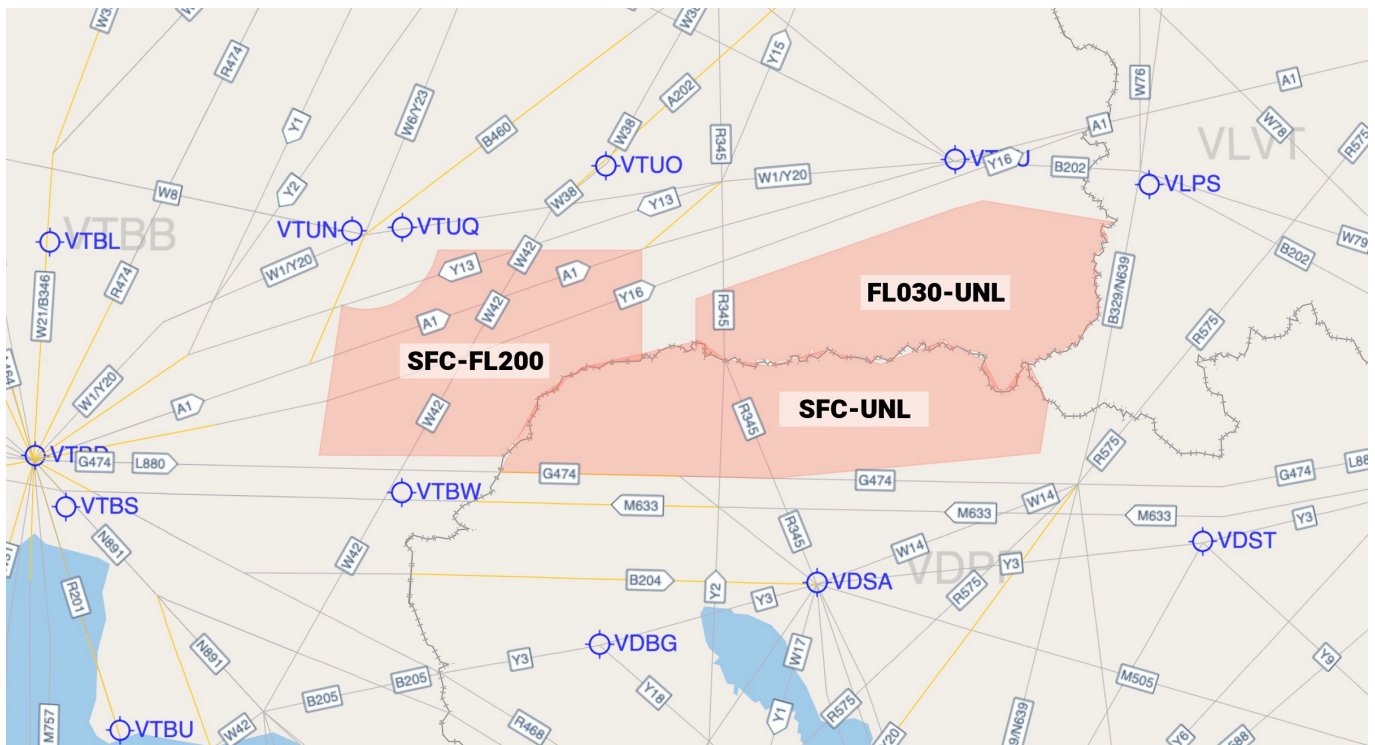

Cambodia and Thailand's long-standing border dispute has flared since May, when a Cambodian soldier was killed in a skirmish. In the weeks since, alleged landmine incidents have endangered Thai troops.

Political turmoil in Thailand has added to the crisis – its Prime Minister was suspended after a leaked call with Cambodian leaders linked to the dispute.

By July 24, the conflict had escalated into one of Southeast Asia's most serious military confrontations in over a decade, involving **airstrikes, heavy artillery, and mass civilian displacement**.

Danger Areas

Thailand and Cambodia have both issued Notams (under the VDPF/Phnom Penh FIR and VTBB/Bangkok FIR codes), activating **danger areas across a large portion of the shared border at all levels**.

What's notably absent from the Notams is any mention of the reason behind the danger area activations: **an escalating conflict on the ground**.

Cross-border fighting has involved heavy artillery and military airstrikes. Unannounced military activity poses **potential risks to civil aviation at all levels** – including from air defense systems and GPS interference.

We advise caution in the open airspace above.

High altitude airways affected include:

North/Southbound

R345 – the airway connecting VDSA/Siem Reap with northern Thailand.

Y2 – connects southern Cambodia with northern Thailand.

These routes are currently off-limits, as they pass through the main danger areas.

West/Eastbound

A1/Y16/Y13 - airways connecting the Bangkok airports with eastern Thailand and Vietnam. The danger area here only extends up to FL200, with airline traffic still transiting these routes.

At time of writing, there are no new state-issued airspace warnings concerning either Thai or Cambodian airspace.
