

# Hurricane Ian: Florida Airport Closures - Sep 30 1200z

30 September, 2022

Tropical Storm Ian, which impacted Florida as a hurricane on Wednesday, is gaining new strength as it approaches South Carolina today. Forecasts say landfall could take place this afternoon.

The entire coast of South Carolina is under a hurricane warning. Once it makes landfall, Ian is expected to weaken back to a tropical storm as it makes its way across the southeastern US.

Meanwhile, Florida is still assessing the mass of damage from Ian, mostly from flooding.

**National Hurricane Center's Advisory, issued 1200z Sep 30:**

At 800 AM EDT (1200 UTC), the center of Hurricane Ian was located near latitude 31.4 North, longitude 79.1 West. Ian is moving toward the north near 9 mph (15 km/h). This general motion with an increase in forward speed is expected this morning, followed by a turn toward the north-northwest by tonight. On the forecast track, the center of Ian will approach and reach the coast of South Carolina today, and then move farther inland across eastern South Carolina and central North Carolina tonight and Saturday.

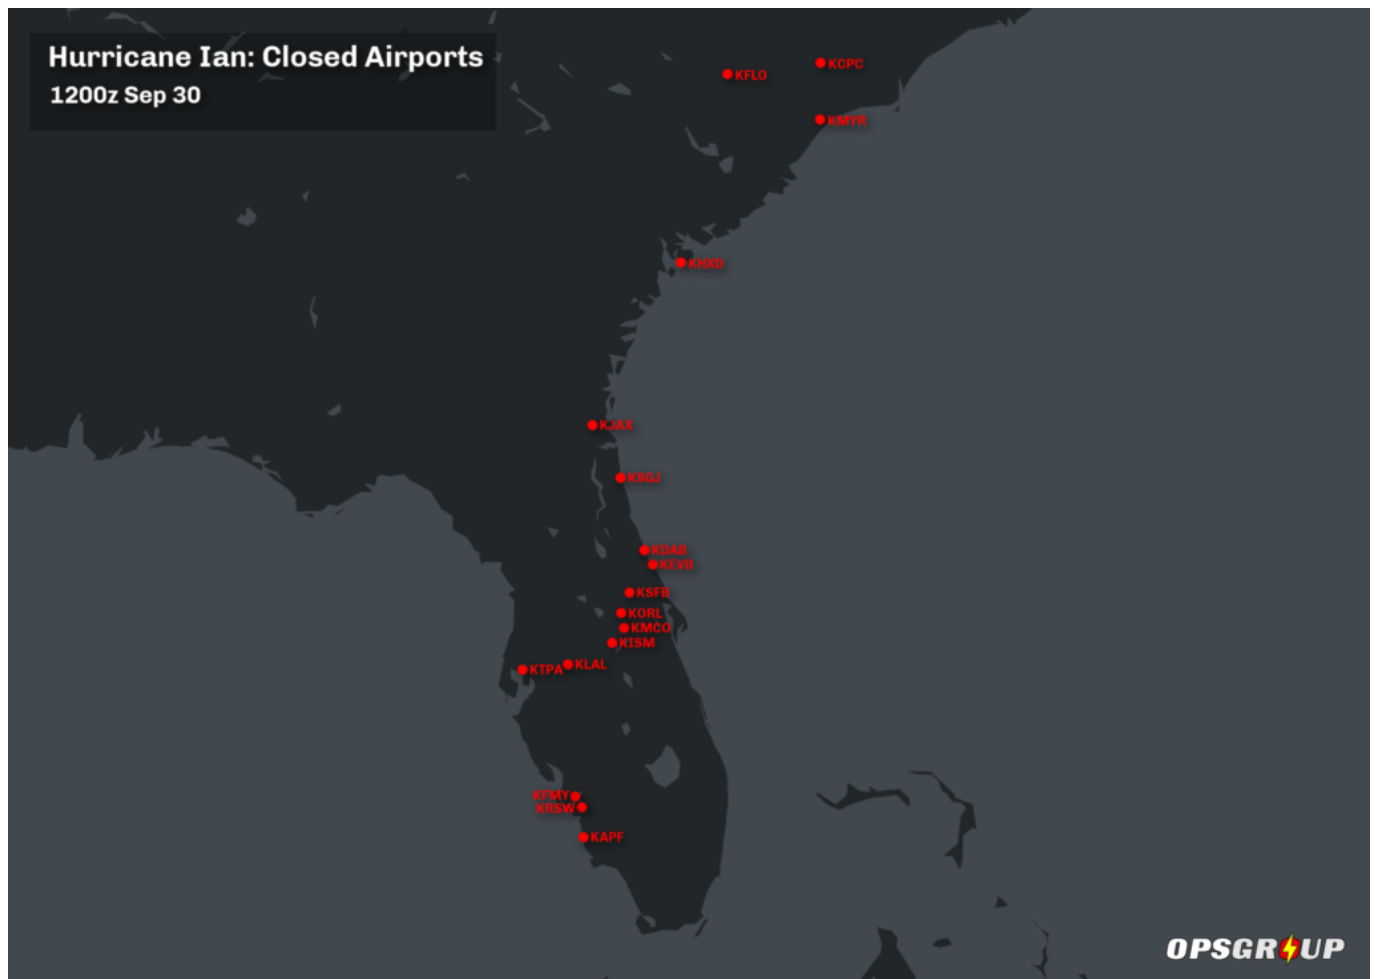

Maximum sustained winds remain near 85 mph (140 km/h) with higher gusts. Little change in strength is expected before Ian reaches the coast later today. Rapid weakening is expected after landfall, and Ian is forecast to become an extratropical low over North Carolina tonight or on Saturday. The low is then expected to dissipate by Saturday night.

Hurricane-force winds extend outward up to 70 miles (110 km) from the center and tropical-storm-force winds extend outward up to 485 miles (780 km). A sustained wind of 40 mph (65 km/h) and a gust to 58 mph (93 km/h) were recently reported at a WeatherFlow station on Fort Sumter Range Front Light in South Carolina.

The estimated minimum central pressure is 984 mb (29.06 inches).

## Airport Closures

Several airports across the region have closed for the passage of the storm. Here are the ones we know about as of 1200z on Sep 30:
