HHZZ/Eritrea The US State Dept has issued a Travel Warning for Eritrea which warns of the risks of travel to Eritrea due to the unpredictable security situation along Eritrea's borders and restrictions imposed by local authorities on travel within the country. All foreign nationals, including U.S. government employees, must obtain permits to travel outside of the capital Asmara. This restriction limits the ability of the U.S. Embassy to provide consular/emergency services anywhere outside of Asmara. This replaces the Travel Warning dated May 6, 2015. Avoid travel along all border regions. In June 2016, fighting in the Ethiopia-Eritrea border region reportedly caused several deaths. Continued political and military tensions between Eritrea and the neighboring countries of Djibouti and Ethiopia pose the threat of possible renewed conflict. Due to regional sensitivities, the State Department also recommends against travel to the border region with Sudan.

FNZZ/Angola The WHO has provided an update on the yellow fever outbreak in Angola and the Democratic Republic of Congo (DRC). The WHO estimates that there have been 6,000 suspected and 1,000 laboratory confirmed cases of yellow fever since the outbreak began in Angola in December 2015. More than 400 people have died from the mosquito-borne disease since that time. However, the last confirmed case in Angola was on 23 June and in the DRC was on 12 July, which the WHO believes is an encouraging sign. Nevertheless, the organization still characterizes the outbreak as "serious" and as requiring "sustained, controlled measures." Thus far, 22 million people in Angola and 14 million people in the DRC have received vaccinations against yellow fever as part of a large-scale initiative that was prompted by this outbreak.
