DTTC/Tunis Flight crews are warned that they may encounter laser beams or other bright lights in flight.

Mexico Effective 25APR there are some significant changes to the Mexico Permit process. 1. No charter operations will be allowed to operate to Mexico as a private non-revenue flight – all flights are treated as charter. 2. Operators can apply for blanket permits to cover the fleet, but these take 3-4 months. 3. Single Trip Permits can be approved within 5 days. 4. These permits allow for the operator to fly to multiple destinations within Mexico, as long as no new passengers are acquired throughout the trip.

Greek Islands A Eurocontrol phone conference with Aircraft Operators was held on 28MAY to discuss the restrictions this coming summer. You can listen to a playback of the recording here.

Wallis and Futuna Customs and Immigration now require 48 hours PN at NLWW for all international

flights.

Russia Not strictly aviation specific but effective 01JUN Russia has banned smoking in all restaurants, cafes, bars, and airports, trains, hotels, and ships.
