

New Unsafe Airspace Summary and Map

Declan Selleck
20 March, 2018

March 20, 2018: One of our biggest missions in OPSGROUP is to share risk information and keep operators aware of the current threat picture. The latest **Unsafe Airspace Summary** is now published, and available to members **here as a PDF download** (Unsafe Airspace Summary 20MAR2018, edition LIMA).

The **main changes** since the last summary are below. For a current risk map, refer to the Airspace Risk map in your member Dashboard.

The situation in **Afghanistan** remains similar. On March 13, Germany added wording to maintain FL330 or higher, still recommending against landings at Afghan airports.

Germany also issued updated NOTAMs for **Mali**, **Iraq**, and **South Sudan**. All warnings remain as previous, unchanged from the prior NOTAMs.
