North Korea risk elevated

Declan Selleck
24 August, 2016

24AUG: We've published an **updated Unsafe Airspace Summary** today, No. 04/16, which elevates **North Korea** to Level 2 in our warning list. In 2016, there have been increased instances of No Dong and No Dong-2 medium-range ballistic missile (MRBM) launches without prior warning.

On 18th August, France published AIC 20/16 updating their picture of overflight risk worldwide – and for the first time, included North Korea.

Flight Service Bureau's updated **Unsafe Airspace Summary** is valid 24AUG16. Future updates will be made through **OPSGROUP**.
