

World Airports Database

Declan Selleck
20 January, 2017

We needed a reliable, comprehensive Airport database for International Flight Ops. There wasn't one out there.

That was six years ago. All of the databases that we found online - both paid for and free - had flaws that made them unusable in the daily Flight Operation. Too short, too long, not enough data, wrong codes, badly formatted ... We realised that we had to build a new one from scratch.

So we did. In the interim, we've added all kinds of useful data to it, updated it, and made it into what we think is the best database for Ops Controllers, Pilots, Airlines, Software developers, and service providers.

Take a look at the database - you can see a sample 100 records, but the full version is a paid product.

[Download the sample](#)

1	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q
2	ICAO	IATA	Name	Country	STD	DST	Runway	Length	Approach	AOE	Size	Scheduled	Elev	Lat	Long	Continent	Deg Lat
