

MISSING

LEVEL BUSTER

Last seen at EINN/Shannon Airport

If you think you've seen Level Busts:

Set your **QNH in hPa** not inHg

Remember the **transition altitude is 5000'** not 18,000'

Plan it and brief in advance, especially if you're tired

Remember "High to Low, Careful Go!"

BIG REWARD

Less risk of CFIT and TCAS

(And won't be really embarrassing when ATC tell you off)

CALL:

ATC with the right altitude read back!
